

SAMUEL EUSTORGIO MANCILLA ZUNUN

COMPUTER SYSTEMS ENGINEER

I am originally from Huixtla, Chiapas, and I have been living in Cancún, Quintana Roo, for the past three years. Throughout my career, I have worked in systems, technical support, quality, and production. This combination has allowed me to work effectively with end users, technical staff, operators, engineers, supervisors, and vendors. I am practical and organized; when I learn a process, I make an effort to understand it thoroughly, document it, and find a simpler, safer, and more efficient way to carry it out.

PROFESSIONAL PROFILE

I am a Computer Systems Engineer whose experience combines two areas that have shaped my career: technology and industrial operations. In IT, I have worked with Level 1/Level 2 support, Microsoft 365, Windows and Linux, networks, servers, GLPI/OCS, and end-user support. In manufacturing, I have worked in assembly, SMT, fiber optics, and automotive processes, as well as in quality inspection, quality technician, and quality supervisor roles. My background includes root cause analysis, 8D, Ishikawa diagrams, 5 Whys, material control, metrology, and staff training. This experience allows me to analyze problems from both a systems and process perspective, with a consistent focus on continuity, quality, and results.

PROFESSIONAL EXPERIENCE

Concentradora Nueve

02 Nov 2023 – 18 Sep 2026

IT Solutions Specialist / Systems Engineer

- Provided Level 1 and Level 2 technical support to users both remotely and on-site, resolving hardware, software, connectivity, system access, Microsoft 365, SharePoint, and OneDrive for Business issues.
- Managed users, permissions, licensing, password vaults, DNS records, and corporate resources, supporting access and operational requests.
- Administered file servers, databases, business web systems, and Synology NAS storage, troubleshooting availability and access issues.
- Implemented and administered GLPI and OCS Inventory to centralize incident records, IT assets, and equipment traceability.
- Coordinated incidents and requirements with licensing and technology service providers whenever escalation or follow-up was required.
- Developed internal tools and automations to streamline operational processes and support recurring tasks.
- Diagnosed and supported DHCP, DNS, VLAN, SSH, LAN/WAN connectivity, and Grandstream IP telephony.

Tatung México

21 Jul 2021 – 11 Aug 2023

Quality Inspector / Quality Technician / Quality Supervisor

- Started as a Finished Product Quality Inspector, verifying that each part met specifications and acceptance criteria before release.
- When material was out of specification, stopped its release, identified it, and segregated it to prevent it from moving forward in the process or reaching the customer.
- Was later promoted to Quality Technician. Performed incoming material inspection, root cause analysis using Ishikawa diagrams, 5 Whys, and 8D, prepared management reports, and verified calibration of precision instruments.
- Inspected reworked material and finished-product shipments, releasing only items that met defined standards and following up on quality findings.
- Trained QA inspectors and created manuals, flowcharts, and visual presentations to standardize inspection. Used vernier calipers, micrometers, tape measures, feeler gauges, surface plates, laser measuring devices, and fixtures.
- Ultimately served as Quality Supervisor, leading a team of 9 people responsible for quality control of television back covers, from incoming inspection and in-process control through final release for customer shipment.

Scientific Atlanta de México (Foxconn)

19 Jul 2022 – 14 Sep 2022

Assembly Operator / SMT Operator

- Worked in assembly of computer-related products and later as an SMT operator, using automated component placement and soldering equipment.
- Performed visual inspection of solder joints and finished product, controlled materials, and verified components, tools, and workstation conditions at shift handover or process setup.
- Performed basic maintenance and cleaning of SMT equipment and monitored conditions that could affect quality or production continuity.
- Used the production control system to review material consumption and availability, helping prevent line stoppages caused by shortages.

ADC de Juárez (CommScope)

06 Jun 2022 – 18 Jul 2022

Inspection / Assembly / Packaging Operator · Assistant Supervisor

- Performed inspection, assembly, packaging, and quality certification of fiber-optic products using both single-mode and multimode fiber, verifying compliance with quality criteria before shipment.
- Identified nonconforming product and supported its segregation or return while ensuring proper material handling throughout the process.

DC de Juárez (CommScope) — continued

Inspection / Assembly / Packaging Operator · Assistant Supervisor

- Because of my proficiency with systems, I was given production assistant supervisor responsibilities, including creating material requests, printing packing tickets, following up on material supply, and processing defective-product returns.
- Helped maintain line continuity by following up on material requirements and preventing stoppages caused by supply shortages.

International Manufacturing Solutions Operaciones (Firstronic)

10 Aug 2020 – 08 Jul 2021

Quality Control Inspector / Technician

- Started as a Quality Inspector in the automotive industry, inspecting electronic boards for automotive components and verifying produced material before release and shipment.
- Was later promoted to Quality Control Technician. Performed line releases, followed up on in-process defects, segregated material, and issued quality alerts to contain problems before they progressed through production.
- Participated in root cause analysis using Ishikawa diagrams, 5 Whys, and 8D, prepared management reports, and verified calibration of inspection instruments and fixtures.
- Followed up on reworked material and products for the end customer, prepared inspection documentation, and supported QA staff training.
- Trained operators in the proper use of automated assembly, soldering, and repair machines, as well as material handling, with the goal of preventing defects at the process stage rather than only detecting them at the end.

TED de México S. de R.L. de C.V.

27 Jun 2019 – 14 Aug 2020

Assembly and Soldering Operator

- Worked in assembly and soldering of automotive components, developing hands-on skills in soldering and part repair.
- Was assigned to a bottleneck workstation; for six months, our shift ranked first in meeting daily production targets and received internal recognition for its efficiency.
- Collaborated with engineering staff by contributing automation ideas and practical improvements to simplify operations that were difficult for operators.
- Trained new employees and supported material control to avoid unnecessary accumulation and reduce waste.

Electro Componentes de México (ECI)

04 Feb 2019 – 23 May 2019

Assembly Operator / Assistant Supervisor

- Started as an automotive wiring harness assembly operator, interpreting work instructions and ensuring proper use of materials during assembly.
- Because of my proficiency with systems and data entry, I later supported production as an assistant supervisor and took responsibility for the quality inspection area for products prior to shipment.
- Monitored materials used by the line and proper interpretation of assembly instructions, helping reduce waste and maintain production flow.

Instituto Nacional Electoral (INE)

03 Mar 2015 – 02 Jan 2019

Data Entry Clerk / Citizen Services / IT Support

- Worked in data entry and citizen services, reviewing documentation submitted for voter ID applications and verifying that the information was complete before the process continued.
- Performed data entry, document classification, and document control. To speed up the recording of exceptional transactions and testimonial documents, I partially automated data entry with a macro that organized information according to the module supervisor's instructions.
- In addition to data-entry duties, provided support for office equipment, including application installation, preventive computer maintenance, printer installation, and configuration of scanners and signature pads.
- This experience allowed me to combine direct user service, careful information handling, adherence to procedures, and technical support to maintain the module's daily operations.

TECHNICAL & OPERATIONAL SKILLS

SYSTEMS & PLATFORMS	Windows · Linux · Microsoft 365 Administration · Active Directory · Exchange Online · Hyper-V
SUPPORT & SERVICE DESK	Level 1/Level 2 Support · Remote and On-Site Support · Help Desk · GLPI · Hardware/Software Troubleshooting · Preventive and Corrective Maintenance
NETWORKING & COMMUNICATIONS	DHCP · DNS · VLAN · SSH · Firewall · LAN/WAN · Asterisk IP Telephony · Structured Cabling
SERVERS & STORAGE	Synology NAS · File Servers · Databases · Web Services · Docker
QUALITY & CONTINUOUS IMPROVEMENT	Incoming Inspection · In-Process and Final Inspection · Ishikawa · 5 Whys · 8D · Quality Alerts · Material Release and Segregation · QA Training
METROLOGY & INSPECTION	Vernier Calipers · Micrometers · Tape Measures · Feeler Gauges · Surface Plates · Laser Measuring Devices · Fixtures · Calibration Verification
MANUFACTURING & PRODUCTION	SMT · Assembly and Soldering · Single-Mode/Multimode Fiber Optics · Automotive Wiring Harnesses · Material Control · Line Continuity · Shipping
DATA & AUTOMATION	Power BI · Advanced Excel · SQL · MySQL/MariaDB · Visual Basic .NET · Java · Process Automation · Data Entry and Information-Organization Macros
MANAGEMENT & OPERATIONS	OCS Inventory · Asset Management · Vendors · Technical Documentation · Incident Management · QA Team Leadership · Staff Training

EDUCATION

Bachelor's Degree in Computer Systems Engineering

2005 – 2009

Universidad Valle del Grijalva

Upper Secondary Education / High School

2002 – 2005

CECyT 03 de Villa Comaltitlán

Secondary School

1999 – 2002

Secundaria Miguel Hidalgo y Costilla

Primary Education

1993 – 1999

Escuela Primaria Lic. Manuel Rea

ADDITIONAL TECHNICAL TRAINING

Linux Administration · Information Security (Palo Alto Networks | Fortinet Certificate) · Hyper-V Virtualization · Database Administration · Advanced Excel · Programming Logic · Structured Cabling · Quality Control in Manufacturing Industries

SELF-DIRECTED PROFESSIONAL DEVELOPMENT

End-to-end website development, from planning and structure through development, deployment, and production launch. Development of internal tools and automations designed to simplify operational tasks.

LANGUAGES

Spanish: Native | English: Basic–Intermediate Speaking · Intermediate Listening Comprehension · Intermediate–Advanced Writing

TARGET ROLES

Level 1/Level 2 Technical Support · IT Infrastructure · Systems Administration · Quality / QA · Quality Technician · Quality Supervision · Process Improvement · Manufacturing Operations
